

Jan 06, 2011

Dear Valued Customers and Friends:

Happy New Year!!!

I am very pleased to inform you that on Jan 04, 2011, EnVision Systems was acquired by **GSE Systems, Inc.** (GSE) ( NYSE Amex Stock Exchange: GVP). GSE is a leading global provider of high-fidelity, DCS replica, real-time simulation and training solutions to nuclear, fossil and combined cycle power plants, process industries (refining, oil & gas, petrochemicals, specialty chemicals, food and beverage, and nuclear waste processing), and military applications.

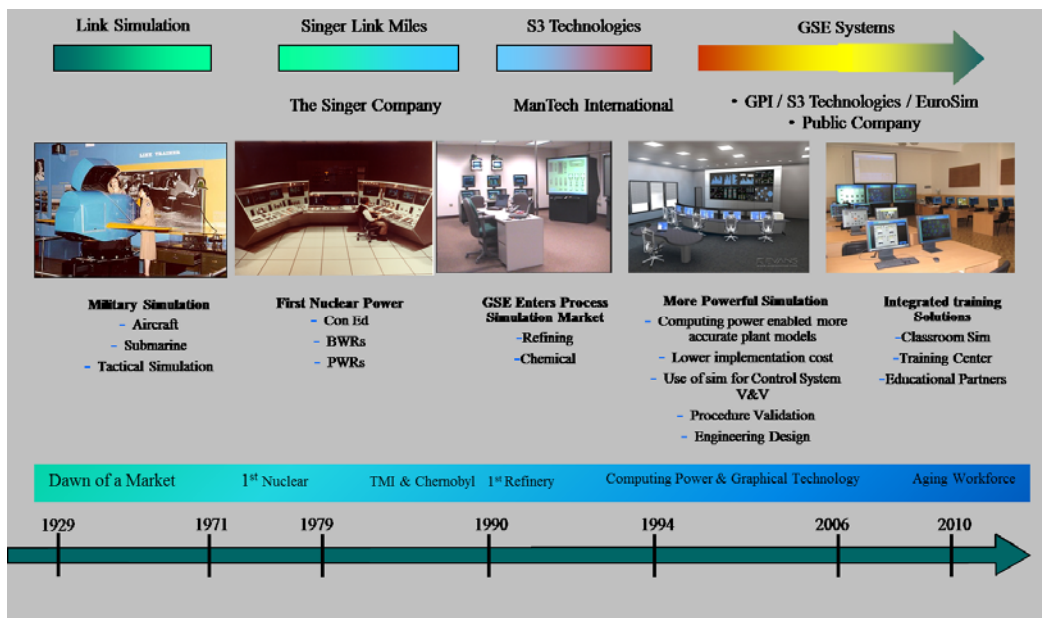

In addition to the capability to model all major refining processes, GSE has developed detailed and high fidelity models for training of startup, shutdown, normal and emergency operations for oil production platforms including wellhead systems, oil and gas separation systems and gas compression systems. Other simulation capabilities include models for LNG Production, Unloading, Vaporizers and Distribution.

*With this acquisition, we become one of the largest independent publicly traded simulation companies.*

GSE Systems is headquartered in Sykesville, Maryland, USA; located in the western suburbs of Baltimore, Maryland. GSE's global locations include offices in St. Marys and Augusta, Georgia; Tarrytown, New York; Nyköping, Sweden; Stockton-on-Tees, UK; and Beijing, China.

GSE has more than four decades of experience, with over 360 installations and 100 customers in more than 40 countries. They have more than 240 experienced employees worldwide, who are specialists in simulation software modeling, computer systems and project management. A dynamic company with advanced technologies, extensive expertise, and global presence, GSE is positioned and committed to assisting each of our clients in realizing their objectives for quality, safety, performance, and profitability.

While the name "GSE" may not immediately be recognized, they are the combined resources of General Physics International, S3 Technologies (previously the Singer-Link Simulation Systems Division), and Eurosim (Sweden). Today GSE designs, develops, and delivers real-time, high fidelity simulation software, systems, and services worldwide. GSE has a long term, proven industry commitment as you can see from the company history and its evolution diagram below.

For more information, please visit GSE Web site: <http://www.gses.com>.

I want to assure you that this acquisition is not only good for GSE and EnVision, but also for you, our valued customers.

- “GSE brings broad marketing and sales support, as well as access to other sectors of energy markets, such as nuclear, fossil and combined cycle power plants. In addition, GSE’s experience and extensive base of engineering resources will facilitate the development of new learning modules. GSE and EnVision products effectively complement each other to meet a broad range of educational and training needs for technical institutions and industrial clients.”
- We share the same core values, code of ethics and common mission. As always, we endeavor to “*Listen to Our Customers*”, always make “*Customer Satisfaction our Top Priority*”, and strive to “*Exceed Customer Expectations*.”
- With products that complement each other, GSE and Envision can now offer cost effective and proven training services and “Total Training Solutions” from a single vendor; from generic CBTs and Simulations, to partial and fully customized DCS based replica Simulators.
- Dr. Toshi Shinohara, Co-Founder and President of EnVision, also worked at Singer-Link ( a predecessor of GSE ) in 1975 to develop the world’s first digital computer based simulator for oil industry.

My experience also includes the development of Nuclear and Fossil training simulators. Hence GSE and Envision share a common background.

- GSE will provide EnVision with operations, services and development resources that will allow us to better serve you, our customers, and develop an even closer business relationship to meet all your future training needs.

GSE will provide the technology to develop EnVision generic training modules for power, gas turbines, and combine cycle integrated heat recovery systems. GSE is also conducting research in exciting new technologies with applications in training which will be announced in due course.

- EnVision’s agreements and relationship with you, our valued customer, will not be changed. We are now a subsidiary of GSE named “**GSE EnVision Inc.**” I ( Mr. Santosh Joshi ) will be the President of “GSE EnVision” and Mr. A. S. Anand will continue to be Managing Director of “GSE EnVision (India)”.

*After 20 years of his timeless dedicated service, Dr. Toshi Shinohara, a co-founder of EnVision and President, has retired effective Dec 31, 2010. However, he will continue to guide us for the coming year and act as a consultant during the transition period.*

*I would like to take this opportunity to thank Toshi for his vision, support, guidance and optimism in laying out the firm foundation for EnVision’s products and for what the company has become today.*

- Although GSE is a much larger company, management personnel value open communications and are readily accessible to all employees and customers. They can be reached directly at any time and I would like to take this opportunity to introduce some of GSE’s key management personnel:

- Jim Eberle Chief Executive Officer; [jim.eberle@gses.com](mailto:jim.eberle@gses.com)
- Chin-Our Jerry Jen President; [jerry.jen@gses.com](mailto:jerry.jen@gses.com)
- Gill R. Grady Sr. Vice President; [gill.grady@gses.com](mailto:gill.grady@gses.com)

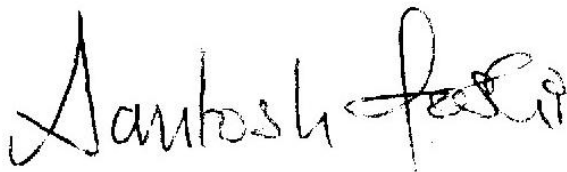

*Note: I will be reporting to Gill Grady, but will also be working closely with other key management personnel.*

Should you have any questions about this announcement, please do not hesitate to contact me or GSE Management.

I would like to thank you as our valued customer, most sincerely, for your business and trust in EnVision Systems. With "GSE EnVision", I firmly believe our relationship will grow ever stronger.

We look forward to serving you with exciting new training products for many more years to come.

Sincerely,

A handwritten signature in black ink that reads "Santosh Joshi". The signature is written in a cursive, flowing style.

**Santosh Joshi**
